NANZ

AQ-MM-5.2-X912PC_2912PC

The NANZ Thermostatic Volumetric Shower control is manufactured in solid brass and features Huber anti-scalding technology. In addition, a safety feature requires button activation to reach the hottest temperatures. Valve comes with integral check valves and stops for easy installation and serviceability. Matching bath and basin fittings are offered, as are coordinating bath accessories and cabinetry. Selected examples appear below. Basic shapes stripped of all adornment would be the best way to describe the NANZ Minimal collection. Working strictly to create the best designs while focusing only on proportion and composition, the product become small functional sculptures to adorn one's interior spaces. Stacked three dimensional metal shapes, the fittings are exceedingly useful in modern interiors and can be equally successful juxtaposed in traditional settings. A variety of bath friendly finishes are offered. Contact one of our offices for more information and assistance with specification.
