NANZ®

No 9165

The No 9165 is a simple lever designed to operate "Lift and Slide" doors. The escutcheon incorporates a positive stop mechanism that holds the lever in a locked or operable position. The minimalism on the face of the shank and the edge of the escutcheon keeps it from looking too severe and makes it suitable for a variety of different styles and interiors. The lever measures 7" with a 4-1/2" x 1-1/2" escutcheon. All Nanz plated and patinated finishes are available.
