NANZ®

N° 2862

Designed as part of the Chizler Collection, the N° 2862 lever design began with hand drawings, followed by wooden models. In the studio, files, saws, chisels and scrapers are utilized to fashion masters which are in turn used to create molds. Each handle is made through the lost wax process. The textured and organic nature of this handle interacts beautifully with a range of finishes. The handle can be used with traditional full-mortise locksets or manufactured for use with multi-point doors and tilt & turn windows. All NANZ plated and patinated finishes are available.

WIDTH	4-9/16"
PROJECTION	2-3/8"
