

N° 1020G

Fine crystal handles gained popularity in the late 19th century and have since been a symbol of refinement and elegance in the home. The N° 1020G crystal knob is a modern interpretation of the classical crystal knob, however it is hand cast and polished using the same manufacturing techniques used in the 1880s. The handle forms a slightly compressed sphere which flattens on the underside. The simple cylindrical shank and rose are available in all Nanz finishes. The straightforward design is appropriate for a variety of interiors and can be paired with a number of rose designs. A minimum order is required.

Diameter: 2-1/2"

Projection: 3-3/8"
