NANZ®

YELLOW AVENTURINE

For certain special projects, our clients have elected to order hardware that combines materials and finishes in imaginative ways. We've worked with wood, leather, stone, crystal and precious metals. We can also powder coat hardware. As one might imagine the possibilities are endless, so we have simply provided an edited selection of the materials and finishes we offer. While combinations are somewhat intuitive, there are certainly limitations. We ask you consult a member of our team about achieving your ideal handle and we will work creatively to make it happen.

We can incorporate stone in a number of creative ways. We can use the the stone as grips for pulls or levers, we can use stone veneer as a field covering for escutcheon plates or flush pulls or we can use smaller stones to punctuate particular parts of various handles for example the hot or cold inserts on vanity cross handles or the boss at the center of a knob. These variations are relatively achievable but require a degree of engineering in order to best select the type and thickness of the materials. Once an order is received, we often provide renderings of our client's creations to fine tune the plan and ensure their hopes are met.
