

N° 5780

The N° 5780 classical French escutcheon plate derives from a Louis XVI-period design, with its openwork diamond pattern and radiating demilunes on either end. Most Nanz handles can be used with this escutcheon; the No 2120 is often specified. It is also available for use with a thumbturn or as a keyhole escutcheon. All Nanz plated and patinated finishes are available.
