

## N° 1228CG

The No 1228CG knob, recalls the drum-shaped knobs of the turn of the 20th century. A cove rings the straight sides, and the face rises in a shallow cone. A series of concentric grooves on the face lend the knob a complex overall aesthetic. The rose, with slightly pitched face, rises to meet the shank of the knob with grooves echoing the knob. Full mortise entry locks, privacy locks, passage latches, as well as tubular latches can be provided for use with this knob. Custom monogramming is available. All NANZ plated and patinated finishes are available.

Diameter: 2-3/8"

Projection: 2-1/4"
