

AQ-AD-5.1DVC-2007

The American Moderne-inspired Art Deco collection focuses on intersecting stacked planes and recalls Donald Deskey's work and Raymond Loewy's streamlined designs of the 1920s and '30s. It has been a symbol of luxury and craftsmanship and corresponds to many major works in America in the first half of the 20th century.

The NANZAQUATIC Volumetric/ Diverter Shower control is manufactured in solid brass and features Fluehs technology. The control works with 1/2" or 3/4" NANZAQUATIC volume control valves, 2-way and 3-way diverter valves, with or without shared ports. A variety of bath friendly finishes are offered. Contact one of our offices for more information and assistance with specification.

Baseplate: 2"

Handle Height: 3"

Length: 3 5/8"

Collection: Art Deco
