The Drum soap dish holder evokes 18th-century Neoclassicism through the use of reeding in its flourishing backplate. The visual play of the decorative lines against the high-quality ceramic creates a sophisticated design that is suitable for a variety of traditional and early modern interiors. The off-white, oval dish incorporates three interior ridges to prevent soap from dissolving in excess water. Manufactured in solid brass, the holder is available in twelve NANZ plated and patinated finishes. A comprehensive suite of aesthetically related bath hardware is also available, including towel rings, robe hooks, and glass towel rods.
