NANZ

AQ-DM-5.1-2111

The NANZ Thermostatic Shower control is manufactured in solid brass and features Huber anti-scalding technology. In addition, a safety feature requires button activation to reach the hottest temperatures. Valve comes with integral check valves and stops for easy installation and serviceability. From the mind of mercurial designer Steven Sclaroff emerged the French Drum knob No 1011 which led to The Drum Collection. Banded with ogival moulding and ringed with simple astragals, the components are decorative yet restrained. A perfect solution for both modern and traditional interiors. Our sets may be customized by choosing from our varied range of handles, spouts, bells, bonnets and rod finials. Matching bath and shower fittings are offered, as are coordinating bath accessories and cabinetry. A variety of bath friendly finishes are offered. Contact one of our offices for more information and assistance with specification.
