NANZ

AQ-FT-5.1-2017

The NANZ Thermostatic Shower control is manufactured in solid brass and features Huber anti-scalding technology. In addition, a safety feature requires button activation to reach the hottest temperatures. Valve comes with integral check valves and stops for easy installation and serviceability. Without adornment or needless decoration, the Functional Collection is the most basic set of hardware. Either for back of house staff areas, or for simple interiors where a simple aesthetic is preferred, the Functional Collection is a proper choice. A variety of bath friendly finishes are offered. Contact one of our offices for more information and assistance with specification.
