NANZ®

DARK ANTIQUE BRASS

To achieve Dark Antique Brass, we apply acidic compounds, carefully relieve and finally apply a proprietary overlay that results in the subtle look. This finish is darker than Medium Antique Brass but not as dark as oxidized bronze. You can expect the Dark Antique Brass finish to lighten over time where heavily handled to expose the underlying brass and have the patina itself darken as it ages. Variations in tone and depth are to be expected, as with any hand finish.
