

Shower Set 32

The Nanz Thermostatic Volumetric Shower control is manufactured in solid brass and features FLUHS ceramic valve cartridges. The shower set is pressure balanced and includes a patented anti-scald mechanism. In addition a safety feature requires button activation to reach the hottest temperatures. Matching bath and basin fittings are offered, as are coordinating bath accessories and cabinetry. Selected examples appear below. Basic shapes stripped of all adornment would be the best way to describe the Nanz Minimal collection. Working strictly to create the best designs while focusing only on proportion and composition, the product become small functional sculptures to adorn one's interior spaces. Stacked three dimensional metal shapes, the fittings are exceedingly useful in modern interiors and can be equally successful juxtaposed in traditional settings. A variety of bath friendly finishes are offered. Contact one of our offices for more information and assistance with specification.
