

N° 1019

The No 1019 traditional elliptical knob rests on a shank with a shallow cove profile that reverses the curve of the edge of the knob. The rose, with an ovolo molding around the edge, has three exposed screws. A backplate with hidden fasteners and various levels of adornment including roping and beading is also available. A cabinet version, the No 8019, is also available. All NANZ finishes are available.

Diameter: 2-5/8" x 1-5/8"

Projection: 2-3/8"
