NANZ®

No 1019BV

The No 1019BV beveled elliptical knob brings a modern design to one of Nanz's most classic products. The bevel that travels around the body of the knob creates a gracefully tapering and flaring band. The knob's edge reverses the curve of the shank to create a graceful, aesthetic proportion. The simplicity of the cove rose compliments the arc of the shank. Full mortise entry locks, privacy locks, passage latches, as well as tubular latches may be provided for use with this knob. All NANZ finishes are available.

Diameter: 2-5/8" x 1-5/8"

Projection: 2-3/8"
