

N° 1083R

The two part No 1083R roped knob is composed of a gently curved body with a rope highlight and a rounded insert at its center. The two-part assembly allows for split finishes which create an accented center or a single finish as shown. The two-part structure creates a particularly deep reveal between the boss and the surrounding body of the knob. Popular combinations include a blackened nickel body with a polished insert or an antique gold body with a silver insert. All NANZ finishes are available. Full mortise entry locks, privacy locks, passage latches, tubular latches and a vast array of rose designs can be provided for use with this knob.

Diameter: 2-1/4" 2-1/2"
