No 1104

The No 1104 knob is extraordinary for its slim profile, large diameter and its accentuated projection. The especially deep grooves separating the convex bands and large boss at the face are also of interest. The knobs features are exaggerated making it a truly graphic handle that is otherwise grounded in classic form. The large rose is a simple convex shape rimmed with an astragal. Full mortise entry locks, privacy locks, passage latches and tubular latches can be provided for use with this knob. Available in all plated and patinated finishes, the handle looks its best in both polished as well as antiqued finishes. It has a diameter of 2-1/2" and a projection of 2-3/4".

Diameter: 2-1/2"
Projection: 2-3/4"
