NANZ®

No 2034

The No 2034 lever contrasts curvilinear form with the functional aesthetic of the rose. The transition from the strict geometry of the rose to the streamlined design of the handle is achieved by a simple organic form protruding from a cove detail in the large rose. The No 2034 can be specified for use for multi-point doors, tilt and turn windows and traditional mortise locks. All NANZ plated and patinated finishes are available.

Length:	3-3/8"
Projection:	2-5/8"
Rose Diameter:	2-5/8"
Lever Style:	Transitional
Collection:	Domus
