NANZ

N° 2045

The design of the No 2045 lever fuses organic form with the clean lines of Modernism. The lever's S-shaped faceted handle forms a rib and culminates in a cusp at the upward-rolling end. The rose is ogee-shaped and intersects a cavetto at the edge forming another cusped ridge. Many rose designs can be substituted with this handle. Finishes available include polished nickel, polished chrome, dark oxidized bronze and antique nickel as well as vast array of plated and patinated finishes. This handle can be used with traditional full-mortise locksets or manufactured for use with multi-point doors and tilt & turn windows.The lever measures 3-5/8" long with a projection of 2-1/2".
