No 2065

The No 2065 modern lever was designed in the middle of the 20th century. Minimal in appearance, both ends of the flat handle have a slight curve that reflects that of the circular shank. The base end of the handle continues along the curve of the cylindrical shank while the opposite end mirrors the curve. The edge of the rose continues the motif, however a variety of more detailed roses can be substituted in its place. Available finishes include, but are not limited to polished chrome, satin nickel and dark oxidized bronze. This handle can be used with traditional full-mortise locksets or manufactured for use with multi-point doors and tilt & turn windows. It is also available with a square backplate and exposed fasteners.

Length: 4"
Projection: 2-1/2"
