NANZ

N° 2500

The No 2500 lever embodies a minimalistic aesthetic with its simple cylindrical body and clearly defined bend. While the lever is simple in form, the unique design is hard to overlook. The handle features a flat cut-out bend before meeting the columnar shank. The clean lines make this lever suitable for contemporary and more modern interiors. It is also available as a wood or solid brass handle. All NANZ plated and patinated finishes are available.

U.S. Patent No. D709,347 S
