

N° 3045W

The No 3045 five knuckle butt hinge is suitable for decors ranging from the most traditional to ultramodern, depending on choice of finish and finial design. These hinges feature wider than normal hinge leaves which positions the door out further. When set in a reveal, wide throw hinges allow a door to open 180°. Button finials are illustrated. Larger and smaller hinges are available for different doors of varying thickness and trim conditions. Ball bearing and wide throw hinges are also available. All NANZ plated and patinated finishes are available.
