

N° 3585

The N° 3585 heavy-duty two knuckle butt hinge with a plain cylindrical bushing recalls the International Modernism of the early 20th century. While modern in design, the simple cylindrical knuckles make the hinge suitable for traditional interiors as well. The hinge can be manufactured with any of our full range of finials. Other decorative bushings can also be supplied to fit between the two knuckles. While available in the provided dimensions, it can be customized to any specification. All NANZ plated and patinated finishes are available.

*Special Product: Due to the production process, tooling and fixturing may be required prior to order fulfillment.
