

## N° 4428

The N° 4428 drum-shaped thumbturn, often ordered alongside the N° 1228 doorknob, is a confluence of minimalism and traditional form. The face of the thumb turn rises into a subtle cone and is matched by the incline on the surface of the backplate. The turnpiece typically features knurled edges. It is available in all NANZ finishes.

Diameter: 1-1/2"

Projection: 1-1/8"
