

No 4936
The $\mathrm{N}^{\circ} 4936$ cylinder collar allows a door to be pulled shut by using the lip at the bottom of the plate. The escutcheon, shown with the Nanz mortise cylinder, supplants the need for a handle when a minimum of visible hardware is desired. All Nanz plated and patinated finishes are available.

Height: $\quad 3-1 / 2^{\prime \prime}$
Width: $1-3 / 4^{\prime \prime}$
Projection: $1-1 / 8^{\prime \prime}$
