No 6025

The No 6025 recessed pull is robustly functional yet handsomely proportioned and detailed. The gently swelling penannular handle is attached to a straight horizontal bar. Gaining popularity throughout the 20th century, the pull's pragmatic design is reminiscent of nautical hardware. The No 6025 is also available with a drop ring, keyhole cutout, or thumbturn. It is frequently specified for use with Harmon hinge doors. The face has four exposed screws. All plated and patinated finishes are available.

Height:	3"
Width:	3"
