

N° 6041T

The N° 6041T is a recessed thumbturn most often used for sliding or pocket doors to dressing rooms and bathrooms. The thumbturn can operate a deadbolt and the surrounding recess can be used to slide the door in either direction. The N° 6041 can also be provided as a recessed pull or with a keyhole cutout. The face has four exposed screws. All plated and patinated finishes are available.
