NANZ®

No 8017

The simple, compressed-sphere body of the No 8017 cabinet knob sits atop a straight shank that flares into a rosette. The one-piece construction of body, shank and rosette expresses the pure functionalism of this knob. Its classic proportions make it suitable for a variety of styles and periods. It is often specified with the companion No 1017 functional knob, which is manufactured in a variety of sizes for full-sized doors. All Nanz plated and patinated finishes are available.
