

N° 8034

A single cavetto molding rings the domed face of the No 8034 Georgian cabinet knob. A slight step separates the knob from the shank. Although Neoclassical in origin, the restrained design is also suitable for contemporary interiors. It is often specified with the companion No 1034 Georgian knob, which is manufactured in a variety of sizes for full-size doors. The cabinet knob is available in five sizes and is shown here with an optional rosette. All Nanz finishes are available.
