

N° 9432

Wooden wedge door stops have always been the most basic and ubiquitous of door devices. Here NANZ has created an equally functional but more elaborate version of the classic wedge. Solid brass with a round finial which serves as a handle, the No 9432 is a wonderful version of an age-old classic and is available in all NANZ plated and patinated finishes.

Baseplate: 5-7/8" x 1"
