

NANZ

N° 9496

The No 9496 sash lock is meant to secure double hung windows which are too high to reach. The loop in the latch handle allows a pole and hook (see the No 9581 transom hook) to engage or disengage the latch. A leaf spring holds the latch handle in horizontal or vertical position. All NANZ finishes are available.

Length: 3"

Width: 1-3/4"

Height: 2-3/8"
