NANZ®

## No 9506

The No 9506 is a simple lever designed to operate “Lift and Slide” doors. The escutcheon incorporates a positive stop mechanism that holds the lever in a locked or operable position. The detail on the face of the shank and the edge of the escutcheon keeps it from looking too severe and makes it suitable for a variety of different styles and interiors. All NANZ plated and patinated finishes are available.
