NANZ®

Basin Set 222

Basic shapes stripped of all adornment would be the best way to describe the Nanz Minimal collection. Working strictly to create the best designs while focusing only on proportion and composition, the product become small functional sculptures to adorn one's interior spaces. Stacked three dimensional metal shapes, the fittings are exceedingly useful in modern interiors and can be equally successful juxtaposed in traditional settings. A variety of bath friendly finishes are offered. Contact one of our offices for more information and assistance with specification.
