NANZ®

WALNUT

For certain special projects, our clients have elected to order hardware that combines materials and finishes in imaginative ways. We've worked with wood, leather, stone, crystal and precious metals. We can also powder coat hardware. As one might imagine the possibilities are endless, so we have simply provided an edited selection of the materials and finishes we offer. While combinations are somewhat intuitive, there are certainly limitations. We ask you consult a member of our team about achieving your ideal handle and we will work creatively to make it happen.

Knobs, levers and pulls of wood are a long standing tradition both for traditional and modern hardware. We can use wood as grips for pulls or levers or we can use wood veneer as a field covering for escutcheon plates or flush pulls. These variations are relatively achievable but require a degree of engineering in order to best select the orientation of grain and the choice of material. Once an order is received, we often provide renderings of original concepts to confirm expectations.
