

N° 1045

The spherical No 1045 knob reflects the International Style of Modernism of the 1920s and 1930s, which stripped excessive ornament from design and architecture to achieve a pure form, and used industrial materials, such as steel, to furnish domestic interiors. A single step joins the knob to the shank and a cove meets the simple flaring rose. This listing is for a Knob with a Dummy Mounting plate included.

Diameter: 2-1/8"

Projection: 3-1/8"
