

N° 8992

The N° 8992 Edwardian ribbed cabinet knob, designed by Steven Sclaroff, draws its inspiration from ribbing popular in the late 19th century. The concentric ribs on the top surface break reflections into sharp rings of light and dark. A clean solution for Victorian-inspired homes, the knob has the feel and scale of its predecessor without excessive ornament. It is often specified with the companion N° 1992 knob. The knob can be provided in all NANZ finishes.
