NANZ

No 1305R

The No 1305R Georgian knob continues to refine the streamlined body of the 1305 family with detailed roping. A roped astragal in a shallow step adorns the face. A cavetto molding at the base of the shank forms a transition to the rose, which has an ogee profile ringed by a roped astragal. The knob can be provided in larger diameters for doors, as well as smaller diameters suitable for cabinetry. Backplates for cabinet knobs are available upon request at an additional cost. Full mortise entry locks, privacy locks, passage latches and tubular latches can be provided for use with this knob. The classic simplicity of the knob is appropriate for traditional and contemporary interiors, and is suitable for a variety of rose styles. Recommended finishes include burnished brass, dark oxidized bronze, polished brass and polished nickel, though all Nanz finishes are available.
