

N° 3004H

The N° 3004H hammered olive knuckle hinge employs an interior bearing system for smooth operation with standard or heavy doors. The parabolic profile of the hammered knuckles presents a handsome decorative element when an alternative to butt hinges is required. Unlike most competing products which are made in parts and soldered together, the N° 3004 is of solid forging, making it both stronger and more attractive. The hinge can be finished in a wide variety of Nanz plated and patinated finishes. The hinge is handed; a right-hand hinge is shown. Smaller versions, the N° 3001H and N° 3002H, are suitable for cabinetry. Straight, roped, beaded, knurled, faceted, and octagonal bushings can be substituted for the plain version shown.

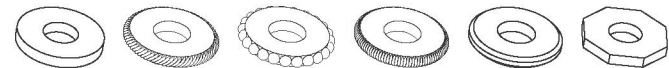

Height x Width 6 x 4

Leaf Gauge .250

N° 12 x 1¼ flathead slotted wood screws are included, machine screws can be substituted upon request.

Dimensioned templates are available online at www.nanz.com.
